Description

American International School welcomes applications from teachers interested in joining our High School Computer Science department. Instructional responsibilities include one class of Advanced Placement (AP) Computer Science A, three classes of AP Computer Science Principles, and an introductory level course in basic coding and design. The successful candidate will be a passionate and inspiring educator, keen to work with students, colleagues, and families, in a highly collaborative, future-focused learning environment.

This is an immediate opening. Whilst the current teacher continues to serve the school and students, in order to support them with a difficult personal need to return to the USA, we are hoping to find the right candidate to take over this position ASAP. As a result, this is likely to be a short term contract position until June 30, 2021; however, if a perfect match is found, the opportunity could become a two or more year term contract.

All curricula at AIS is designed to create an inquiry-based, real-world, problem-solving approach to learning. Our schoolwide Computer Science program is aligned with the ISTE standards, and, at High School, focuses more on the CSTA Standards and the College Board's AP syllabi.

To support the holistic growth of every student, teachers are also required to offer Extra-Curricular opportunities and participate in our annual Outdoor Education & Leadership Program trips.

Expectations

- Appropriate Computer Science certification and teaching experience
- Proven ability to differentiate learning experiences
- Self-driven and proactive attitude
- Flexible, innovative and solutions focused
- Familiarity with standards-based grading and reporting
- The capacity to engage students in a variety of tasks that promote learning opportunities that are social, personal and applied
- Experience with using assessment data (diagnostic, standardized, formative and summative) to inform teaching and improve learning, and to set individual learning goals when necessary
- The ability to create a safe, collaborative learning environment that instills the AIS key mindset of Confidence

AIS Framework

- We instill the key mindset of Confidence.
- We create learning and teaching experiences that are Social, Applied, and Personal.
- We have the Confidence to pursue our Core Values: Justice, Knowledge, Love.
- We honor our past. We embrace our present. We choose our future.

American International School is committed to the safety and protection of children. All faculty and staff are expected to comply with our child safeguarding expectations.
